

receiving a text request comprising a unique identifier and unformatted text, wherein the unique identifier identifies an electronic file;

parsing the text request to identify the unique identifier; and

requesting the electronic file identified by ~~associated with~~ the unique identifier.

2. The method of claim 1, wherein the request comprises more than one unique identifier, the requesting step further comprising the steps of:

providing the unique identifiers to a user for selection of one or more of the unique identifiers; and

querying a user to order the file identified by ~~associated with~~ the selected unique identifiers.

3. The method of claim 2, further comprising the step of querying a user for delivery of a file identified by ~~associated with~~ the selected unique identifiers.

4. The method of claim 3, wherein files identified by ~~associated with~~ the selected unique identifiers are delivered as a bundle.

9. A computer implemented method for retrieving items, the method comprising:

receiving a request comprising a unique identifier and data, wherein the unique identifier identifies an item;

parsing the request to identify the unique identifier; and

requesting the item identified by ~~associated with~~ the unique identifier.

10. The method of claim 9, wherein the request comprises more than one unique identifier, the requesting step further comprising the steps of:

providing the unique identifiers to a user for selection of one or more of the unique identifiers; and

querying a user to order the items identified by ~~associated with~~ the selected unique identifiers.

A2 11. The method of claim 10, further comprising the step of querying a user for delivery of an item identified by ~~associated with~~ the selected unique identifiers.

12. The method of claim 9, wherein items identified by ~~associated with~~ the selected unique identifiers are delivered as a bundle.

---

22. A system for retrieving items comprising:

a request module receiving a unique identifier and unformatted data wherein the unique identifier identifies an item;

A3 a parser module identifying the unique identifier; and

an order module that enables a server system to process an order for the item identified by ~~associated with~~ the unique identifier.

---

24. The system of claim 23, further comprising a query module that requests that a user select for delivery an item identified by ~~associated with~~ the selected unique identifiers.

A4 25. The system of claim 24, wherein items identified by ~~associated with~~ the selected unique identifiers are delivered as a bundle.

---
